Lugdunon Startup Scripts (2.3.0)

Startup scripts for the Lugdunon MMORPG software - uses the "screen" command to manage session. This also restarts the Lugdunon process if it crashes.

Official support sites: Official Github Repo - Official Forum - Official Download Area

These start up the Lugdunon server at boot time with a "screen" process.

  i. Copy **lugdunon** into **/home/lugowner/bin** - make sure it is executable
 ii. Copy **taillog** into **/home/lugowner/bin** - make sure it is executable
iii. Copy **run.sh** into **/home/lugowner/lugdunon** - make sure it is executable
 iv. Copy **startlugdunon** into **/home/lugowner/lugdunon** - make sure it is executable
  v. Put **@reboot /home/lugowner/bin/lugdunon start** into your crontab

When you want to view the Lugdunon console, just enter "**screen -r**" in your shell.

To disconnect from the Lugdunon console just press **CTRL-A CTRL-D**. This will leave it running and you can reconnect to it again.

I have only tested this on a Ubuntu 16.04 server…

If you want to turn off the server respawning type "**touch /home/lugowner/lugdunon/nostart**". To reenable it type "**rm /home/lugowner/lugdunon/nostart**".

Note: If you don't already have the "screen" tool installed you will need to install it by "**sudo apt-get install screen**".
